

WHY FORCE2 FOR MEDICAL FACILITIES

Not all wipes are made equal, and if you don't know what to look for you may end up purchasing a wipe that doesn't accomplish what you need it to.

Per PDI's website, the most-purchased wipe in the medical field is the Purple Sani-Cloth wipe. It's fast kill time is attractive in a medical setting, but it contains alcohol. Those who want a quat formula to avoid tarnish and damage then choose the Gray top, at the cost of a slower kill time. But all nurses and medical staff have a new best friend in our Force2 Disinfecting Wipes. Effectively kill more bacteria and viruses without compromising on speed or damaging your equipment.

THE BREAKDOWN

			
# Of Pathogens Killed	52	32	45
Kill/Dwell Time	2 Min.	2 Min.	3 Min.
Wipe Count, Per Canister	220	160	160
Canisters Per Case	12	12	12
5-Part Quat Formula	✓	✗	✗
Alcohol Free	✓	✗	✓
EPA Approved	✓	✓	✓
Effective Against Emerging Pathogens*	✓	✓	✓
Made In The USA	✓	✓	✓

*including viruses like SARS-CoV-2 and Monkeypox.

The clear cut choice for Healthcare Settings is the Force2 Disinfecting Wipes. 2XL's advanced 5-part quat formula has no downside for clinical settings.
